DETAILED ACTION

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

1. As for claim 1, the prior art does not teach or fairly suggest the use of a color reproduction system that calculates a tristimulus value corresponding to a spectral reflectance of an **object sensed under sensing illumination by using spectral reflectance data of a color chip obtained under observation illumination, sensitivity data of the input device and color matching functions.**
2. As for claim 7, the prior art does not teach or fairly suggest the use of two imaging devices, wherein the first imaging device calculates a spectral reflectance of image data on the basis of spectral sensitivity data of said first image sensing means, spectrum data of the sensing illumination light, statistic data of a spectral reflectance of the object; and the second imaging device sensing a color chip under observation light; and **calculating tristimulus values of the object under the observation illumination light on the basis of the output spectral reflectance image data, sensed color chip image data, spectral sensitivity data of the second imaging device, color chip spectral reflectance data representing a spectral reflectance distribution of the color chip, and color matching function data.**
3. As for claim 11, the prior art does not teach or fairly suggest the use of two imaging devices, wherein the first imaging device calculates a spectral

reflectance of image data on the basis of spectral sensitivity data of said first image sensing means, spectrum data of the sensing illumination light, statistic data of a spectral reflectance of the object; and the second imaging device sensing a color chip under observation light; and **calculating tristimulus values of the object under the observation illumination light on the basis of the output spectral reflectance image data, sensed color chip image data, spectral sensitivity data of the second imaging device, color chip spectral reflectance data representing a spectral reflectance distribution of the color chip, and color matching function data.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
